

**Cap closed - unlocked**  
Turn the ring under the cap in order to lock.

**Locked !**  
When locked, the wedge completely fits in the frame.

**Lock released**  
Turn the ring further in the same direction to unlock.

▲ **GOLD AWARD - GENTLELOCK® CAP**

**Company:** Hearheart.Corp  
**Country:** Japan  
**Email:** contact@gentlelock.net  
**Web:** www.gentlelock.com

This is a screw cap system of a new generation which prevents leaking on impact and is highly child-resistant. The cap is locked and unlocked by turning the ring under it in the same direction as to “close” the cap. Opening the locked cap requires two actions in opposite directions. The system will largely help prevent possible seismic fires caused by overturning of plastic tanks of oil and contamination of solutions at the medical front, as well as leakage of beverage or cosmetics whilst carrying.

▲ **SILVER AWARD - CLOROX SMARTTUBE® TECHNOLOGY**

**Company:** The Clorox Company  
**Suppliers:** ALPLA and Guala  
**Country:** USA  
**Email:** carrie.clark@clorox.com  
**Web:** www.clorox.com

Clorox has launched the largest innovation in spray technology in the last 20 years with the introduction of Smart Tube® technology. This new package features a bottle with a blown-in dip tube that couples with a bayonet style trigger, enabling the consumer to spray every usable drop of liquid.

◀ **BRONZE AWARD - BALGO HONEY SPOON**

**Company:** Dervolit Met. Plastic San. Tic. Ltd. Sti.  
**Country:** Turkey  
**Email:** eliz@balgo.com.tr  
**Web:** www.balgo.com.tr

Inspired by the many natural benefits of honey, the Balgo Honey Spoon was designed

to streamline the process of adding honey to your drink. No more messy packets or sticky fingers- simply peel back the spoon's cover and drop it in your drink. The spoon doubles as a stirrer so there's also less waste! Balgo offers; an easy, portable and practical solution; it is the first product that pioneers the benefits of honey usage into hot drinks. Unique, innovative design of Balgo is 100% recyclable material.

▶ **BRONZE AWARD - ATA 300 CATEGORY 1 CASE**

**Company:** XPAC Technologies Pte Ltd  
**Country:** Singapore  
**Email:** hawhann.ong@xpactech.com  
**Web:** www.xpactech.com

In the aviation industry, aircraft components need the best packaging methods during transportation, particularly Air Transport Association 300 Category 1 standards. To meet the requirements, an innovation of incorporating a unique locking feature interlocks the top and bottom case via the tongue and trough, helps the case to stay in place when impacted.
